📁 Projects

Dynamic Portfolio with Export to PDF 🔗
Developed a dynamic portfolio platform using the MERN stack, featuring customizable templates and PDF export functionality for seamless portfolio creation and sharing.

ToDo App 🔗
Created a responsive and interactive Todo application utilizing HTML, CSS, JavaScript, Bootstrap, and React, allowing users to seamlessly add, update, delete, and view their tasks.

Shopping Cart 🔗
Designed and implemented a dynamic shopping cart website with HTML, CSS, JavaScript, Bootstrap, and React, featuring responsive and interactive design. Users can seamlessly add, remove items, and observe real-time cart count adjustments.

React-Cart-Page 🔗
Created a responsive and interactive cart page website using HTML, CSS, JavaScript, Bootstrap, React, and integrating Redux. Allows for dynamic product manipulation including removal, quantity adjustment, and real-time updates of total amount and quantity.

Rest Countries & Weather 🔗
Designed and implemented a responsive and interactive website providing comprehensive details on all countries and real-time weather information using HTML, CSS, JavaScript, and Bootstrap.
